OUR COMPANY OVERVIEW

WE ONLY SUCCEED WHEN YOU DO

Since 1985, Diversified Labeling Solutions has been a preferred B2B supplier of high-quality, custom-printed pressure sensitive labels. Beginning with one press, one employee and 1500 square feet of space, DLS quickly grew to be a full-line label manufacturer. Although DLS's focus has changed from printed tape to the pressure sensitive label market, their goal of producing the finest products available while maintaining world class service has not. All products, from blank labels to full color high-definition labels, are produced utilizing the latest in flexographic and digital printing technologies. Exemplar of their motto "We only succeed when you do," DLS's dedicated team is passionate about labels and are willing to share their expertise with partnered distributors to help them grow their business.

Located in four states with over 200 employees and headquartered in Itasca, IL, DLS is well-situated to offer products to customers nationwide. Diversified Labeling Solutions remains committed to keep ahead of a constantly changing industry while meeting the demands of their always growing, loyal customers.

DLS is a member of the TSC Printronix Auto ID family, a global provider of quality Auto-ID solutions for transportation and logistics, manufacturing and healthcare, industry and retail. TSC has over 25 years of experience dedicated to barcode and label printers, with more than 4 million installed in over 90 countries. That puts the company, headquartered in Taiwan, into the top 5 manufacturers of thermal label printers in the world.

MAKING GHS SIMPLE

GHS LABELS

WHAT IS GHS?

GHS stands for the Globally Harmonized System of Classification and Labeling of Chemicals.

GHS is a system to standardize the way hazardous materials are classified. The idea is that the same criteria will be used all over the world to determine if a material is flammable, toxic or corrosive, etc. We are then assured that if a material is considered toxic in China it will also be so in the USA, Europe, Brazil and elsewhere around the globe.

WHY CARE ABOUT GHS?

If your customer ships chemical drums or other packaging via marine transport, their GHS labeling system must use labels for those products that are certified to BS5609 specifications. You must work closely with your label supplier to make sure your customer's labels have received BS5609 certification.

WHAT DOES BS5609 MEAN?

It is a British Standard certification to determine the label's overall durability in marine conditions. The label must pass certain criteria to make sure it can withstand weathering, abrasion, colorfastness and adhesion.

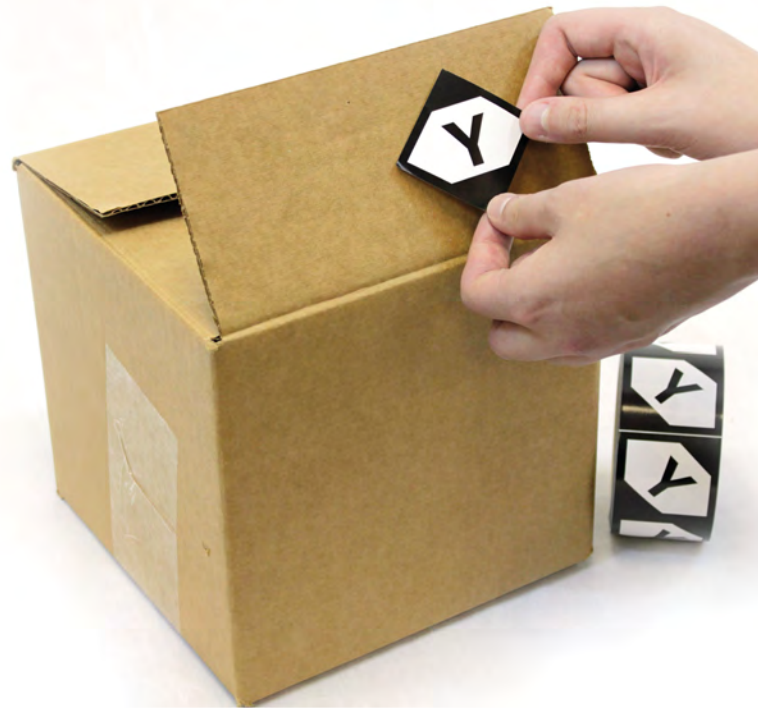

NEW GHS STANDARDS BEGAN IN JUNE 2015.

OUR **PICTOGRAM** & **CHEMICAL LABELS** ARE DESIGNED TO **COMPLY** WITH THE **GLOBALY HARMONIZED SYSTEM**

SECTION 2. ARTWORK CHECKLIST & MEDIA INFO

MEDIA INFO

- All files supplied on disk should be accompanied with a color print out with Pantone colors specified.
- Please supply necessary files only.
- Include all "placed" (EPS or TIFFS) images as separate files on the disk. This allows us to perform "Dot Gain" cutback.
- We are not responsible for damage to media or files. Send copies of files only; **PLEASE DO NOT SEND ORIGINAL FILES.**
- Disks will be returned only if it is requested.
- All media will be retained on file as a working backup. If return is requested, we are not responsible for the condition of the document or retention of any art data.

COLOR CHECKLIST

- Screens and solids do not always run together in flexographic printing. Solid color could be 1-2 shades lighter in order to keep the screens clean.
- Consider using a one spot color when possible and stay away from knock-outs in multiple colors (i.e. Process). A 1pt keyline of solid black or any other dark solid spot color used in the design will ensure quality reproduction.
- Bitmap/rasterized graphics should be 300dpi, saved as EPS and scaled in Photoshop.
- Allow the design to accept at least .5pt of trap.
- Digital print is incapable with some PMS colors.

COPY CHECKLIST

- Type sizes are no smaller than 4 pts. in positives and 5 pts. in reverse type.
- Line weights are no thinner than .35 pts. in positives and .75pts. in reverse type.
- Provide all the fonts used or outline all fonts.
- Drop shadows without a keyline can cause registration problems in flexographic printing.
- Bleeds should be .125" off cut line or fold line.
